

**REMARKS**

This is in response to the *Ex parte Quayle* action dated January 25, 2005.

Applicant notes with appreciation the Examiner's allowance of all pending claims. Only formality issues remain.

While applicant does not agree with the object in the second paragraph on page 2 of the Office Action, in order to expedite prosecution the applicant has amended the application to specifically recite the word "majority" in the specification. Since the figures clearly show the subject matter, no new matter has been added.

The drawings stand objected to in the third paragraph on page 2 of the Office Action. This drawing objection is respectfully traversed for at least the following reasons. For example and without limitation, Fig. 1 illustrates that the auxiliary capacitor electrode 8 overlaps the majority of the pixel electrode and display screen since the figure shows that the electrode 8 is formed over the pixel region with the exception of the relatively small areas 12 and 14 outlined in dashed lines. See also, for example, Figs. 4-5 and 7. The specification expressly states that a "matrix" of these pixels is provided in the display screen (e.g., paragraph [0045]), so it is clear from the drawings that the electrode is formed over a majority of the screen.

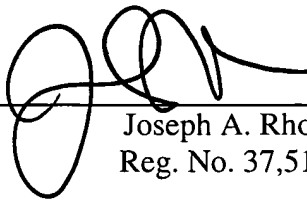

For at least the foregoing reasons, it is respectfully requested that all formality objections be withdrawn. The case is in condition for allowance. If any minor matter remains to be resolved, the Examiner is invited to telephone the undersigned with regard to the same.

NAKAJIMA  
Appl. No. 09/993,898  
March 24, 2005

Respectfully submitted,

**NIXON & VANDERHYE P.C.**
